REMARKS.

**RETURN TO CIA LIBRARY**

25X1A

1. The Alt Loennewitz (N 52/E 84) airfield (location see Annex) was observed in clear weather from its eastern and southern borders between 8 a.m. and 1 p.m.
2. Twenty-four fighters parked in a row were counted in front of the closed hangars. Four jet fighters were observed about 400 meters north of Alt Loennewitz, in line with the runway.

Description of these planes: Short wings, no details available, air intake at nose bigger than air exhaust at tail, torpedo-shaped fuselage about 10 meters long, comparatively high rudder assembly, elevator assembly set at upper third of rudder assembly, painted a light silver (see Sketch 2 of annex).

3. No activities were observed. In Falkenberg (M 52/L 74) officers and soldiers walked about as on a holiday.

4. The following vehicles were observed between the field and town: [REDACTED] [REDACTED]

25X1B

5. Although the visibility was good the previously observed radar set was not to be seen at any of its former places.

25X1A [REDACTED] comment:

Report supplements a previous report originating from [REDACTED] 25X1X  
[REDACTED]\*. The most essential supplementary item of information  
is the description of the jet planes stationed at the field.  
According to this description, these planes represent the same  
swept-back fighter which was also observed at other fields in the  
Soviet Zone of Germany. Apparently all these swept-back planes  
are of the same type. The attached sketch gives a rough idea of  
the possible measurements of this design.
